PROFILE

Ambitious Mathematical Science graduate specializing in Statistics and Computer Science with professional expertise in full-stack development and data science. Experienced full-stack developer proficient in modern frameworks (Vue.js, React, .NET) and cloud technologies, with a proven track record of building scalable web and mobile applications. Skilled in collaborative development environments, applying agile methodologies and leveraging strong problem-solving abilities to create community-driven, impactful technical solutions.

PROFESSIONAL EXPERIENCE

2026 – Present
Johannesburg,
South Africa

Software Developer

MasterBatch SA

- Developing and maintaining web applications using AngularJS
- Maintaining and refactoring existing code to improve performance, readability, and stability
- Building reusable components and services to keep the codebase clean and maintainable
- Integrating RESTful APIs to support dynamic data handling across applications
- Building and maintaining CI/CD pipelines using Gitea Actions to automate builds, testing, and deployments
- Collaborating in an agile team through daily stand-ups, sprint planning, and retrospectives

2024 – present
Pretoria, South Africa

Full stack developer

Softidoc

- Developed and maintained responsive web applications using Vue.js and React.js, ensuring high performance and usability across devices.
- Built reusable components and efficiently managed application state using Vuex and Pinia.
- Integrated RESTful APIs to support dynamic, real-time data handling within applications.
- Developed robust backend services and APIs using C# and .NET framework to support frontend applications.
- Implemented real-time communication features using SignalR for live data updates and interactive user experiences.
- Actively contributed to agile development practices, participating in daily stand-ups, sprint planning, and retrospectives.
- Developed Progressive Web Applications (PWA) to enhance mobile engagement, providing offline access and app-like experiences.
- Assisted in troubleshooting technical issues across web and mobile platforms, ensuring minimal downtime and fast resolution.

2023

Computer lab assistant

University of Limpopo

- Assisted students and staff with troubleshooting hardware, software, and network issues.
- Monitored lab usage and enforced lab rules to maintain a productive environment.
- Provided technical support for printing, scanning, and login-related issues.
- Supported instructors during computer-based tutorials or practical sessions.

EDUCATION

2023	BSc Math and computer science <i>University of Limpopo</i> Specialized coursework in Statistics, Data Analysis, Algorithms, and Software Engineering principles
2017	Senior certificate <i>Rietondale High School</i>

PROJECTS

TshwaneBusWatch (React Native & .NET Core)

- Created a community-driven mobile app to solve the problem of commuters waiting indefinitely for buses that never arrive, enabling users to report incidents and delays in real-time so others can make alternative travel plans
- Developed cross-platform solution using React Native (Expo) and TypeScript with real-time bus tracking, community incident reporting, and push notifications
- Built a .NET 8 ASP.NET Core Web API backend with PostgreSQL, implementing repository pattern, soft-delete architecture, and SignalR for real-time communication
- Designed device-based authentication system using hardware IDs and implemented geolocation-based incident reporting with 24-hour cooldown enforcement to prevent spam
- Integrated Expo Push Notifications for instant alerts to subscribed users and optimized database queries using EF Core with split queries and eager loading

Chatsta (Flutter & Vue.js with C# Backend)

- Developed a cross-platform chat application using Flutter with real-time messaging features.
- Implemented user authentication and secure data handling with a clean and responsive UI.
- Currently developing a comprehensive Vue.js frontend version with a custom-built C# backend API.
- Architected and developed RESTful API endpoints using C# and .NET Core for user management, messaging, and data persistence.
- Implemented real-time bidirectional communication using SignalR for instant messaging and live updates.
- Designed and implemented database schema and data access layers using Entity Framework Core.
- Applied best practices in state management, API integration, and cross-platform development.
- Focused on delivering a seamless user experience across Android, iOS, and web platforms.

Personal Portfolio Website (HTML, CSS) [<https://yandhile.netlify.app/>]

- Designed and developed a responsive personal website using HTML and CSS.
- Showcases professional information, skills, projects, and contact details.

CERTIFICATES

2023	Microsoft Azure AI Fundamentals <i>Microsoft</i> Foundational knowledge of AI and machine learning concepts, Azure AI services, computer vision, natural language processing, and conversational AI solutions
2022	Applied Data Science <i>WorldQuant University</i> Comprehensive program covering statistical analysis, machine learning algorithms, data visualization, and quantitative research methods

SKILLS

- HTML5
- CSS3
- C++
- Vuejs
- Nodejs
- Git
- ReactJs
- Flutter
- C#
- Python

SOFT SKILLS

- Problems solving
- Communication
- Teamwork
- Resourcefulness
